RE: LOC2010-0037

The Ramsay Community Association cannot support LOC2010-0037 as we were not circulated on the complete Application package including CPAG review and Applicants Submission, until we obtained a copy of the CPC report from the CPC Agenda website on Friday April 9 because of this we have had insufficient time and information to review and comment.

Any legislation that over-rides protection of the riparian environment from structures in the floodway and over-rides the protection of the community from livestock accommodation in close proximity, demands public consultation, and comment from adjacent neighbours, the Community Association, and Alberta Health Services.

Therefore we recommend that LOC2010-0037 be taken off the Calgary Planning Commission agenda until the Community and all the above interested stakeholders have time to comment.

Sincerely,
